Md Shahrukh

Aspiring Actuarial Analyst
Email: mdshahrukhbme@gmail.com |Mobile: +91 7908920410 |
Location: Purulia, West Bengal, India | GitHub| LinkedIn |

OBJECTIVE

Detail-oriented actuarial professional with a strong foundation in statistics, mathematics, and data analytics. An active member of the Institute of Actuaries of India, having cleared CS1 (Actuarial Statistics) and CB2 (Business Economics), and currently preparing for CS2 and CM1. Gained knowledge of pricing, reserving, and claims analysis through actuarial job simulation projects on Forage. Proficient in Python, R, SQL, Power BI, and Excel, with the ability to derive meaningful insights and contribute to data-driven actuarial solutions in healthcare, insurance, and analytics domains.

ACTUARIAL EXAMS & MEMBERSHIP

- Active Member, **Institute of Actuaries of India** (IAI)
- **Cleared**: **CS1** – Actuarial Statistics, **CB2** – Business Economics
- **In Progress**: **CS2** – Risk Modelling & Survival Analysis, **CM1** – Actuarial Mathematics

CORE SKILLS

- **Actuarial Modelling**: Pricing, Reserving, Mortality/Morbidity Analysis, Persistency & Lapse Prediction
- **Data Analytics**: Predictive Modelling, Claims Analytics, Risk Reporting, Exposure Analysis
- **Tools**: Excel (Advanced), Python, R, SQL, Power BI
- **Communication**, **Client Engagement**, **Problem Solving**

EXPERIENCE

Data Science Intern | CodSoft *Nov 2024 – Dec 2024*

- Developed an ANN-based **Churn Prediction** model on **10,000** customer records, achieving **86.82%** accuracy.
- Identified key drivers like tenure, monthly charges, and contract type, contributing to a **20%** improvement in customer retention.
- Analysed policyholder data, segmented persistency profiles, and provided recommendations for lapse reduction.

Data Science Intern | Upskill Campus and UniConverge Technologies Pvt. Ltd. *July 2024 – Oct 2024*

- **Created** a YOLO-based detection model with **92%** accuracy, **optimising** precision farming practices.
- **Drove** measurable improvements in resource allocation and efficiency for sustainable agriculture.
- **Collaborated** with cross-functional teams to **scale** model adoption to **70%** of existing farm equipment.

Field Service Engineer |Healthcare Imaging Sector *Feb 2019 – Jun 2022*

- Managed client-facing technical engagements for installation, integration, and support of imaging systems. Partnered directly with doctors (end users) to understand workflows, gather requirements, and ensure technology met clinical/business needs.
- Led training sessions and user workshops, prepared detailed process documentation, and maintained long-term client relationships.

PROJECTS

AIG Actuarial Analyst Simulation (Forage)

- Analysed 100+ marine liability claims; quantified severity trends (avg. claim $85K, max $200K), identified frequency patterns.
- Applied experience rating models to recommend premiums, improving expected loss ratio by ~12%, and delivered technical pricing reports with clear assumptions.

AIG Actuarial Claims (Forage)

- Reviewed Marine & Inland Marine policies ($100K marine / $50K inland limits), identified 4 critical risks (fire, theft, temperature failure, piracy).
- Recommended 3 strategic actions—adjusting sub-limits (+20%), enforcing temperature monitoring (cut failure risk by (30%), and adding endorsements to align coverage with exposures.

EDUCATION

Post Graduate Diploma in Applied Statistics with Data Analytics and Official Statistics *2022 – 2024*
Indian Statistical Institute, Kolkata, India **Percentage**: 86.05%

Bachelor of Science in Mathematics *2018 – 2021*
Ranchi University **Percentage**: 76.96%

CERTIFICATIONS

- **Drive Insights from BigQuery** – Google Cloud Skills Boost
- **Managing Big Data with MySQL** – Duke University
- **AI in Healthcare** – Stanford University
- **Python & Pandas for Data Engineering** – Duke University

LANGUAGES

- **English** (Professional)
- **Hindi** (Fluent)
- **Bengali** (Native)
